Production

Our manufacturing unit showcases **state-of-the-art technology**, featuring high-speed drawing, stranding, and extrusion lines. The newly developed Aluminum Facility meets the rising demand for overhead transmission, combining precision technology with rigorous in-house testing to ensure unmatched quality and sustainability in our products.

Power Solutions

Our ACSR Conductors and Aerial Bunched Cables offer **superior performance** for overhead transmission. Designed for high tensile strength, they ensure efficient power distribution, reducing line losses and enhancing safety in densely populated areas. Experience quality and reliability with our advanced solutions.
